Callaghan Innovation

Te Pokapū Auaha Callaghan Innovation is Aotearoa New Zealand's government innovation agency. We work with tech-based entrepreneurs and innovators, helping them successfully commercialise their ideas. We support ventures operating in sectors like biotech, which we see as having immense potential to help move our country to a high-wage, high-value economy. As well as funding these ventures through grants, we offer deep scientific expertise through our R&D Solutions team to help customers overcome scientific and technical challenges.

Category: Research & Development
