## Pharmako Biotechnologies

Pharmako Biotechnologies is an Australian company, specialising in the development and manufacture of advanced delivery system technologies for active ingredients. Clinically proven and award-winning, our technologies offer ingenious solutions for the nutraceutical, functional food and cosmeceutical industries. Designed to increase bioavailability and uptake by the body while dramatically improving the functionality of actives, nutrients are more effective, easier to take and work faster at a reduced dose, for enhanced health outcomes and more sustainable use of resources.
